Harvest Midstream Company Announces the Completion of the New Ingleside Pipeline

HOUSTON, TX – June 23, 2020 – Today, Harvest Midstream Company announced the completion of the new Ingleside Pipeline and provided an update on the Harvest Midway Terminal’s construction schedule.

“As a result of the successful and timely completion of the Ingleside Pipeline, Harvest customers will receive direct access to all three Ingleside terminals. This is one of the fastest growing export centers on the Gulf Coast and we are excited to share this growth with our customers,” said Sean Kolassa, President of Harvest Midstream Company.

The Ingleside Pipeline, a 24-mile, 24-inch oil pipeline, has a capacity of 600,000 barrels per day (bpd) with up to 380,000 bpd supplied by the existing Harvest Eagle Ford pipeline systems. The pipeline is currently able to transport volumes to the Flint Hills Resources Ingleside Terminal, and will be capable of shipping barrels to the South Texas Gateway Terminal in July 2020 and the Moda Ingleside Energy Center in September 2020.

“Harvest has always provided our customers with reliable and safe transportation,” said Jason Rebrook, CEO of Harvest Midstream Company. “We look forward to providing that same consistent service with our expanded operations and the additional storage and connectivity in the Ingleside and Corpus Christi markets.”

The pipeline originates at the Harvest Midway Terminal located in Taft, Texas. The terminal covers 160 acres and has the potential to construct up to 10 million barrels of crude storage. Phase 1 construction of the Harvest Midway Terminal is expected to be completed by the end of Q3 2020 and will add new infrastructure capable of pumping the Ingleside Pipeline at 600,000 barrels per day.

###

Harvest Midstream Company:

Harvest Midstream Company is a privately held midstream services provider based in Houston, TX. Harvest operates crude oil and natural gas gathering, storage, transportation, treatment, and terminalling assets across the Lower 48 and Alaska. To learn more visit:
